

SE – Overview of IT Industry

Name : Panchal Heer

Subject : Software Engineering-Overview of IT Industry

Session 4 : SDLC-Software Development Life Cycle

Software Development Life Cycle(SDLC) is a structured process used to develop high-quality software efficiently.

Task 1 : List All 6 Phases of SDLC

Phase	Description
Requirement Gathering	Collects and analyzes user requirements.
Design	Creates the software architecture and design.
Development	Developers write the application code.
Testing	Tests the software and identifies defects.
Deployment	Releases the software to users.
Maintenance	Fixes bugs and provides updates after release.

Task 2 : Differences Between Agile and Waterfall

Agile	Waterfall
Flexible and iterative approach	Sequential approach

Changes can be made during development	Changes are difficult after planning
Frequent customer feedback	Feedback mostly at the and

Task 3 : Scrum Roles

1.Product Owner (PO) :

Manages product requirements and priorities.

2.Scrum Master :

Ensures Scrum processes are followed properly.

3.Development Team :

Develops , tests , and delivers the product.

Task 4 : What is a Sprint?

A Sprint is a fixed period during which a Scrum team completes specific work items.

- **Typical Duration** : 1 to 4 weeks.

Task 5 : Jira Board Columns

Column	Meaning
Backlog	List of pending tasks and requirements.
To Do	Tasks ready to be started.

In Progress	Tasks currently being worked on.
Done	Completed tasks.

Conclusion :

This session explains SDLC phases , Agile and Waterfall methodologies , Scrum roles , Sprint concepts , and jiraworkflow management.
